(57) Abstract: [PROBLEMS] To provide a distribution request control method and the like, by which a communication service provider can perform data signal distribution, while maintaining high reliability. [MEANS FOR SOLVING PROBLEMS] A maximum distributable number is discretionary set to a request for distribution of signals, including data of contents, to one or a plurality of contents providing servers (31) provided on a communication network (30), from a mobile communication network (10). A request control unit requests a contents distribution server to distribute signals within a range of the maximum distributable number.
